Alam Sekitar Malaysia Sdn Bhd (ASMA) and **ALS Technichem Sdn Bhd (ALSM)** have received recognition at the **Air Selangor Business Partners Excellence Award 2026**, held on 28 October 2026 at Setia City Convention Centre (SCCC), Setia Alam.

ASMA received the **Gold Award**, while ALS Technichem was presented with the **Silver Award**, both under the **Water Quality Guardian Award** category.

Presented by Air Selangor, the awards recognise both companies' contributions to water safety and environmental protection through their respective technical capabilities. ASMA's water monitoring activities support the assessment of water quality and the identification of potential environmental risks, while ALS Technichem's laboratory testing services provide essential analytical data for evaluating water conditions and detecting potential contaminants.

Representing ASMA at the award ceremony were En. Azhar Taib, Chief Executive Officer; Datin Suzana Shaari, General Manager of Execution; Zafina Zainol Abidin, Manager of Execution; and Rieita Jamalludin, Senior Executive, Water Segment.

The recognition reflects ASMA's commitment to safeguarding water quality through its water monitoring activities, which contribute to water safety initiatives and the protection of environmental health. Through its technical expertise, ASMA supports the monitoring and assessment of water quality, helping to identify potential environmental concerns and promote cleaner, safer water resources.

This recognition reinforces ASMA's position as a trusted technical partner in the water sector, validating its technical capabilities and strengthening its business-to-business (B2B) positioning. It also enhances the company's standing as a strategic vendor while creating opportunities to promote its proprietary technologies and expertise to industry partner

Similarly, the Silver Award recognises ALS Technichem's contribution through its laboratory testing and analytical services, which support the assessment of water quality and help ensure reliable, accurate monitoring results. Together, the achievements highlight the complementary technical capabilities of both companies, with ASMA's water monitoring activities and ALS Technichem's laboratory expertise contributing to water quality management, water safety and environmental protection.

Congratulations to both companies and their teams on this achievement. May this recognition further strengthen their industry partnerships and continued contributions to water quality and environmental protection.
